SUMMARY

Passionate and results-driven pre-final year Computer Science student with a strong foundation in problem-solving, full-stack web development, and software engineering. Skilled in JavaScript, React, and backend technologies like Express.js and PostgreSQL. Enthusiastic about building innovative solutions and participating in hackathons. Actively seeking opportunities to apply my technical skills in a dynamic and collaborative environment.

EDUCATION

Chitkara University

Bachelor of Engineering in Computer Science
(9.01 CGPA)

Rajpura, Punjab

Jul 2021 – Present

GMSSS-46

Higher Secondary School
(86.6 percent)

Chandigarh

Apr 2020 – Mar 2021

IS Dev Samaj Sr. Sec. School

Secondary School
(80.4 percent)

Chandigarh

Apr 2018 – Mar 2019

HACKATHONS

Event - Aminnovate Hackathon

RapiDoc - [GitHub Link](#) | [Live Demo](#)

March - April 2024

- Developed the **frontend** of RapiDoc using **HTML, CSS, Bootstrap, and JavaScript**, ensuring a responsive and visually appealing UI.
- Designed an intuitive interface for users to find **real-time hospital data**, including blood availability, OPD schedules, and bed occupancy.
- Integrated with backend APIs to dynamically fetch and display healthcare facility information.
- Ensured **cross-browser compatibility** and optimized UI for **fast performance** on desktop and mobile devices.
- Achieved **Top 10** recognition out of **100+** teams for innovation and technical execution.
- Certificate of Participation: [View Here](#)

PROJECTS

Real-time Chat App | *MERN, Socket.io, TailwindCSS*

Feb 2025 – Mar 2025

- Developed a real-time chat app with MERN stack and Socket.io for instant messaging.
- Implemented JWT-based authentication and online user status.
- Used Zustand for global state management and ensured responsive UI with TailwindCSS + DaisyUI.
- Handled full-stack error management and deployed for free.

Password Manager | *Java, AES Encryption, Console-Based UI*

Jan 2025 – Feb 2025

- Built a console-based password manager that securely stores and retrieves passwords using AES encryption.
- Implemented symmetric encryption (AES) using Java's **javax.crypto** library and Base64 for safe string storage.
- Used in-memory data storage with **HashMap** to simulate a basic credential vault.
- Deployed on **GitHub**: [GitHub Link](#).

Binge Watch Application | *React, HTML/CSS, JavaScript*

Jun 2023 – July 2023

- Developed a responsive web application allowing users to browse, search, and manage a list of binge-worthy shows.
- Integrated third-party APIs for real-time data on TV shows and movies.
- Implemented state management using React hooks to handle user interactions and updates dynamically.
- Deployed on **GitHub**: [GitHub Link](#), [Live Demo](#).

TECHNICAL SKILLS

Programming Languages: Java, C, C++, SQL, JavaScript, HTML, CSS.

Frontend Technologies: React.js, Tailwind CSS, Bootstrap.

Backend Technologies: Node.js, Express.js.

Databases: MySQL, MongoDB, PostgreSQL.

Cloud Technologies: AWS (Learning – EC2, S3, Lambda).

Developer Tools: Git, GitHub, GitLab, VS Code, IntelliJ IDEA, Postman.

Software & Other Skills: Figma, Cisco Packet Tracer, Adobe Premiere Pro, Microsoft Office (Word, Excel, PowerPoint).

CS Core Subjects: DBMS, Computer Networks, Operating Systems, Software Engineering, Digital Logic, Object-Oriented Programming (OOP).
